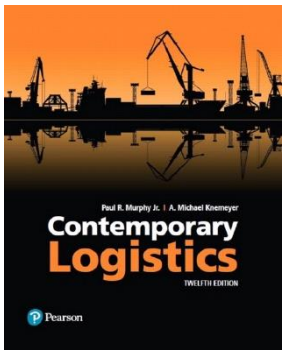
LOGISTICS MANAGEMENT

Online course
Instructor: Valerie DePina
vdepina@westfield.ma.edu
Office hours by appointment

"Logistics management is the part of supply chain management that plans, implements, and controls the efficient, effective forward, and reverse flow and storage of goods, services, and related information between the point of origin and the point of consumption in order to meet customer's requirements."

Wikipedia contributors. (2018, December 31). Logistics. In *Wikipedia, The Free Encyclopedia*. Retrieved 17:46, January 2, 2019, from https://en.wikipedia.org/w/index.php?title=Logistics&oldid=876222228

What does this mean? What does a logistics manager do? In this course, we will explore the definition and importance of logistics, along with the systems and activities that support it. The changing nature of global logistics will also be considered.



Textbook: Murphy & Knemeyer. *Contemporary Logistics, 12th Edition.* Pearson.
