Dear Enrique and Dristi,

I copied a couple resources for teaching remotely that may be useful for faculty. There are a variety of interdisciplinary topics, especially in SERC, including a focus on pedagogy. All activities on these are peer-reviewed and evaluated.

QUBES: <https://qubeshub.org>

QUBES is focused on teaching statistics, quantitative biology, mathematics

SERC: <https://serc.carleton.edu/index.html>

SERC has a variety of interdisciplinary sites and activities - including topics in climate change, environmental science, geography, geology, social science. There are examples of online materials that could also be adapted to any topic as well.

Best,
Jen

Jennifer A. Hanselman, Ph.D.
Dean, College of Mathematics and Sciences
Westfield State University
Wilson Hall, Room 111
577 Western Ave.
Westfield, MA 01086
