Lighting
Your light source should be in front of you so employers can see your face clearly. Rely on lamps as well as natural light to ensure that enough light is projected on you to produce a quality image.

Audio
Make sure to notify family members/roommates about your interview to minimize background noise. Use the mute function to minimize distracting noises when you are not speaking.

Location
Pick a quiet location with a bland background to keep the focus on you. On platforms like Zoom, you can change your background to a more professional background, if needed. Avoid sitting outside as wind, nature and traffic can be picked up in the background.

Technology
Test out the interviewing technology to familiarize yourself with it and assess your bandwidth. Secure the interviewer's phone number prior to the interview in case there is an issue.

Attire/Body Language
Sit up straight in a chair, dress professionally and look at the camera whenever possible. Smile, engage and be yourself!
