

## **ServiceNet Outpatient Clinics**

### *Position Openings*

We're looking for outpatient clinicians to join our mutually supportive, progressive community mental health practice. Recent MSW graduates eligible for LCSW are encouraged to apply.

We value each team member's unique and powerful contributions to the work, and believe that taking care of others begins with taking care of ourselves—and each other. And, you'll be working with adults, families, and children as diverse as the communities we serve, including people from our residential and outreach programs.

**New clinicians receive weekly supervision towards licensure** and earn free CEUs through the trainings we offer. Also, as a clinician on our team you will have many opportunities to learn from and to share knowledge with your colleagues as part of specialized consultation teams. We even offer a weekly group designed specifically to support new clinicians!

ServiceNet operates outpatient clinics in Northampton, Holyoke, Amherst, Greenfield, and Pittsfield.

**We pay a starting base rate of \$33/hr. for LCSWs plus incentives** for groups, and working with families and children. Interested?
