This course will include a study of art history starting with the Old Stone Age and going through Early Gothic times. We will review painting, sculpture, and architecture. Through this we will see the evolution of different cultures and societies.

We will learn through on-line power point presentations which includes viewing of images, web learning including videos, and google earth showing actual sites via satellite, u-tube and more. We will use a variety of available media to enhance our walk through art history. The format of the class will also include text book reading.

Evaluation will be done primarily through on-line quizzes and tests, and online class discussions.

Our course objective is to have a more complete understanding of Art in an historical context. To be able to compare and contrast different periods of art. To apply critical thinking as we explore similarities and differences in art forms. To
understand the goals of the artists and societies relating to specific creations. To enhance our art vocabulary. To have a better appreciation of art through our understanding of how to view art, why it was created, and in what context.
