

**PSYC 0308-501**  
**Statistics for Psychologists**  
**Ψ**

**Instructor:** Terri Stewart Kinstle, Ph.D.  
**Email:** tkinstle@westfield.ma.edu (once enrolled in the class, all email should occur through Plato)

**REQUIRED RESOURCES:**

Students will need to have access to:

- (1) Gravetter, F.J., & Wallnau, L.B. (2014). *Essentials of Statistics for the Behavioral Sciences, 8<sup>th</sup> ed.* Belmont, CA: Wadsworth/Cengage
- (2) Aplia 1-Semester Printed Access Card for Gravetter/Wallnau's *Essentials of Statistics for the Behavioral Sciences, 8<sup>th</sup> ed.*

In order to have access to these resources, students have 2 options, available through the WSU bookstore:

- (1) Students can purchase Aplia access, which comes with the book in ebook format (no physical copy). For this option, the ISBN is 9781285079707. This is the least expensive option.

-OR-

- (2) Students can purchase Aplia access, which comes with the ebook, AND receive a looseleaf version of the textbook (for those who prefer to have a physical copy of the book). For this option, the ISBN is 9781285481685. This option is slightly more expensive than the first option.

**IMPORTANT:** Regardless of which option is chosen, students need to register for Aplia as soon as possible. Complete instructions and a link for accessing Aplia (which includes the eBook) are available in the "Start Here" section of the course Plato site. Instructions for accessing the course on Aplia are also included on the last page of this syllabus. (Note that you can access the course on Aplia immediately - even if you have not yet purchased the access code. There is a two-week "grace period," after which you will need to purchase your own code, using one of the options above.)

Contact Dr. Kinstle if you have any trouble registering for/accessing the course on Aplia!

**SPSS:** SPSS stands for "Statistical Package for the Social Sciences." This is a Windows-based application that supports statistical analyses. All students will also need to have access to SPSS during this course. For students who are local and can get to WSU, you may use the program for free in any WSU student computer lab. If you are not local or cannot get to campus for some other reason, you will need to purchase an SPSS (Student version/Grad pack) 6-month access code to download the software onto your home computer. You need either version 22.0 or 23.0. I encourage you to look at the following sites to find the cheapest option (generally \$40-\$65):

[www.onthehub.com/spss/](http://www.onthehub.com/spss/)  
<http://studentdiscounts.com/spss.aspx>

**COURSE DESCRIPTION:** The application of statistical methods to current research problems in psychology. The selection of procedures appropriate to problems, performance of the procedures, interpretation of outcomes, data tabulation and reduction, measures of central tendency and variability, correlation and prediction, tests of significance, t-test, chi square and analyses of variance. **Prerequisites:** PSYC 0101 and PSYC 0105

**LEARNING OBJECTIVES:** By the end of this course, students will be able to...

1. Students will understand and apply basic research methods in psychology, including research design, data analysis, and interpretation, including:
  - a. Use appropriate techniques for describing data and making inferences in psychological research
  - b. Interpret basic statistical results
  - c. Distinguish between statistical significance and practical significance
  - d. Describe effect size and confidence intervals
  - e. Evaluate the validity of conclusions presented in research reports
2. Use appropriate software to produce understandable reports of statistical analyses in APA format.

**ANTICIPATED TIME COMMITMENT:** According to the WSU 2015-2016 Undergraduate Catalog/Student Handbook, each credit hour of direct (in-class) instruction at WSU involves a minimum of an additional two hours per week of work outside of the classroom.

Given this policy, a standard 14-week course would typically involve at least 2 hours of time outside of class for every 1 hour in class. For a 14-week, 3-credit class, students could therefore expect to spend 3 hours in class and another 6 hours (at a minimum) outside of class each week. In a 14-week, ONLINE course, such as this one, students should expect to spend at least 9 hours per week on coursework (a minimum of 126 hours total for the course).
