

Biology Today (BIOL 106) Online

Instructor: Dave Christensen PhD

This biology course is offered entirely online, both lecture and lab!

The course is an introduction to the study of cells, cellular reproduction, inheritance and the gene, molecular genetics, and the development of organisms. The course concentrates on human genetics and development. Investigates the role of biotechnology in genetics and development.

The lab provides students the opportunity to apply some biological concepts in an online laboratory format. Labs will include the use of online models and activities, discussion forums and videos.
