MICROFRIDGE UNITS

To satisfy student demand for refrigerators and microwave ovens in the residence halls, we are pleased to offer you the opportunity to rent a Microfridge refrigerator/freezer/microwave oven unit for the coming academic year. With its unique combination of features, efficiency and value, the Microfridge is the only combination food storage and cooking appliance offered in our residence halls, and the only microwave oven permitted on campus (except Apartment Complex kitchens).

Why lease a Microfridge?

1. Convenience to eat what you want, when you want. The freezer is a true 0 degree freezer, not a tiny ice cube holder like in “cube” refrigerators. The 2.1 cu. ft. refrigerator has movable racks and door storage; and the 700 watt oven has both a turntable and a programmable touchpad.

2. 100% guarantee of free repair or replacement if your Microfridge ever stops working (other than for abuse).

3. Low cost – cost for the entire academic year is $180.00 – that’s $90.00 per semester, or about $2.80 a week if you share the cost with a roommate!

4. Safety – Microfridge units are designed to prevent blown fuses and tripped circuit breakers through low energy usage, which is why they’re the only units approved for use on our campus.

To reserve your Microfridge, return the enclosed contract along with your check or money order made payable to Westfield State University for $180.00. For credit card payments, complete the credit card information page and submit to:

Residential Life
Westfield State University
Westfield, MA 01086
Attention: Microfridge Program

If you don’t know your hall/room number, leave these spaces blank. If you and a roommate send duplicate Microfridge orders, only one unit will be reserved for that room and each person will receive a partial refund.

AS WE HAVE A LIMITED SUPPLY OF THE UNITS, ORDERS WILL BE ACCEPTED IN ORDER OF RECEIPT.
SEND YOUR APPLICATION IN TODAY!

MICROFRIDGE SPECIFICATIONS

- Microwave Oven: .6 Cu. Ft., interior light, cook/defrost setting, 600 watt cooking power, 300 watt defrosting power, programmable touch pad, turntable to ensure even cooking.
- Freezer: .75 Cu. Ft., zero degree compartment keeping items like ice cream, TV dinners & ice cubes are no problem.
- Refrigerator: 2.1 Cu. Ft., adjustable thermostat, removable racks, door storage.
- ALLOCATOR: An external power switch that is used to run two appliances off one plug. This patented circuitry enables safe and efficient operation of the microwave, refrigerator and freezer without exceeding 10 amps.
