Organizational Development & Behavior

Course Preview

This course examines the foundations for understanding individual and group behavior and relates these points to problems faced by managers. Emphasis is placed on topics of study relevant to developing managerial effectiveness in interrelationships with other organizational members. The course attempts to develop an understanding of the relationship between the individual and organization and to identify management skills that can contribute to effective performance.

The textbook for the course is:

The book will be used for the following section of the 2014 Winter Session: MGMT 0308-550 (10026).
